Dream • Design • Deploy — A blank space isn't an absence — it's an invitation

Rohtak, Haryana, India

## Summary

I'm a B.Tech Electrical Engineering student with a strong passion for technology, innovation, and real-world problem-solving. From building drones and IoT-based systems to designing AI-powered web projects, I love combining hardware and software to create practical, impactful solutions.

I'm currently exploring areas like embedded systems, automation, AI integration, and renewable energy applications — aiming to bridge the gap between electronics and intelligent systems.

Beyond academics, I actively participate in hackathons, team projects, and tech clubs, where I enjoy collaborating, learning, and turning ideas into working prototypes. My goal is to keep learning, experimenting, and contributing to the future of smart and sustainable technologies

---

## Education

Indian Institute of Technology, Madras

Bachelor of Science - BS, Electronic Systems · (October 2024 - October 2029)

Maharshi Dayanand University (MDU), Rohtak

Bachelor of Technology - B.Tech, Electrical, Electronics and Communications Engineering · (September 2024 - July 2028)

Kendriya Vidyalaya (KV)

· (January 2011 - March 2023)
